

25. (Amended) A method of treating a disease in a subject, said disease treatable by transfer of a nucleic acid encoding a therapeutic proteinaceous molecule or RNA to fibroblast-like or macrophage like cells, said method comprising administering the vehicle [of according to claim 1] having at least a tissue tropism for fibroblast-like or macrophage-like cells in a pharmaceutically acceptable manner/in a pharmaceutically effective amount.

Please cancel claim 33.

### Remarks

The application is to be amended as previously set forth in an effort to conform more closely to U.S. practice. All amendments, including the cancellation of claim 33, are made without prejudice or disclaimer. Generally, the amendments remove multiple dependencies and change the grammar to more commonly accepted usage in the Office. It is respectfully submitted that no new matter has been added by the amendments. If questions exist after consideration of the foregoing, the Office is kindly requested to contact applicants' attorney at the address or telephone number given herein.

Respectfully submitted,
